Data Modelling and Form Design for a Business Application in Zoho Creator

18th August 2026

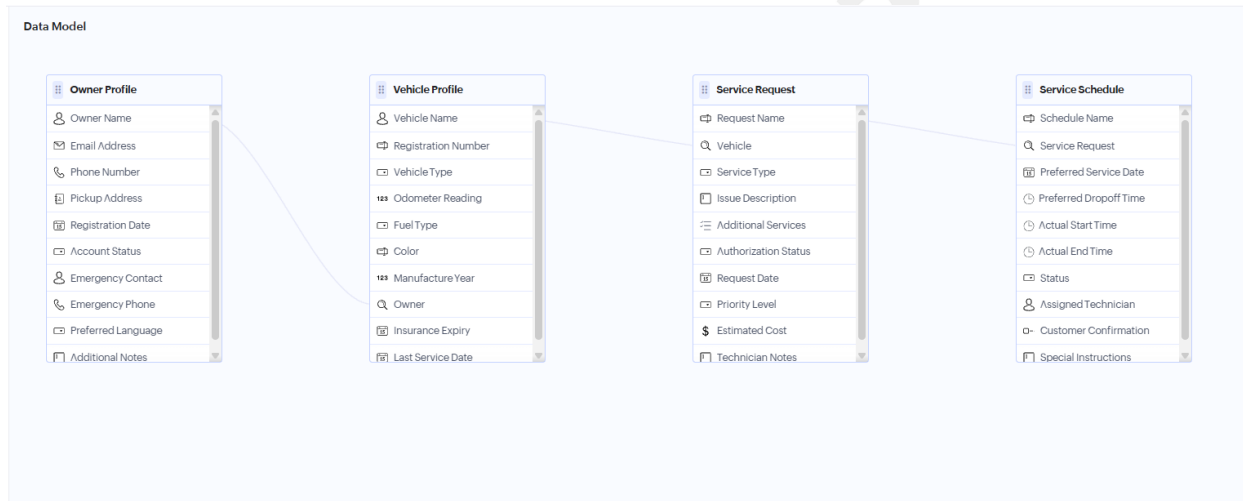

INDHUMATHY K

B.Tech CSBS

AIM

To design and build a functional “Vehicle Service Request Form” application in Zoho Creator that demonstrates the correct usage of all thirteen Basic Fields available in the Form Builder — Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, Drop Down, Radio, Multi Select, and Checkbox — and to model the underlying data structure of a vehicle service intake workflow through a properly configured form and an auto-generated report view.

DIAGRAM

PROCEDURE

1. Application and Form Creation

- Logged into Zoho Creator and created a new application named “Vehicle Service Request”.
- Inside the application, opened the Form Builder and created a form named Vehicle Service Request, which holds all thirteen Basic Fields for the vehicle service intake process.
- This automatically created a linked report, All Vehicle Service Requests, which lists every submitted service request record.

2. Drag-and-Drop of Basic Fields

In the Form Builder, the Basic Fields palette was expanded on the left panel. Each required field was dragged from the palette and dropped onto the canvas in the order needed, then double-clicked to open its Field Properties panel for renaming and configuration, as listed below.

Basic Field	Field Name Set	Drag-and-Drop Configuration
Name	Owner Name	Dropped onto canvas; enabled First Name / Last Name sub-fields; Last Name suffix display kept.
Email	Email Address	Dropped below Owner Name; built-in email format validation left active.
Phone	Phone Number	Dropped after Email Address; country code format set to India (+91).
Address	Pickup Address	Dropped after Phone Number; default Address Line 1/2, City, State, Postal Code, Country sub-fields kept.
Single Line	Vehicle Registration Number	Dropped after Pickup Address; used as a short free-text entry field, marked mandatory.
Radio	Service Type	Dropped after Vehicle Registration Number; mutually exclusive choice options added (Oil Change, Tire Rotation, Brake Repair, Engine Diagnostics, Full Service, Other).
Multi Line	Issue Description	Dropped after Service Type; expanded text area for longer free text.
Multi Select	Additional Services	Dropped after Issue Description; multiple choice options added for multi-pick (e.g. Polishing).
Date	Preferred Date	Dropped after Additional Services; standard date picker.
Number	Odometer Reading	Dropped after Preferred Date; plain numeric entry field.
Drop Down	Vehicle Type	Dropped after Odometer Reading; choice list populated with sample options.

Basic Field	Field Name Set	Drag-and-Drop Configuration
Time	Preferred drop off time	Dropped after Vehicle Type; standard time picker.
Checkbox	Authorization checkbox	Dropped after Preferred drop off time; single toggle option added.

3. Configuring Field Properties

- Selected the Owner Name field and enabled the Last Name display option under Display Fields, in addition to the default First Name sub-field.
- Reviewed the Field name and Field link name for the Owner Name field to confirm they were set to “Owner Name” and “owner_name” respectively.
- Opened the Pickup Address field properties and confirmed the default Address Line 1, City/District, State/Province, Postal Code, and Country sub-fields render correctly on the live form.
- Opened the Phone Number field properties and confirmed the country code defaults to India (+91) with a sample number format (81234 56789).
- Marked the Vehicle Registration Number and Pickup Address fields as Mandatory so that every submitted request includes this information.

4. Live Form Preview

Clicked the Preview / live-application icon in the Form Builder toolbar to view the applicant-facing form and verified that all thirteen Basic Fields render in order with the correct field types — Owner Name (with First Name / Last Name split), Email Address, Phone Number (with +91 country code), Pickup Address (with all sub-fields), Vehicle Registration Number, and Service Type.

5. Submitting Sample Records and Reviewing the Report

- Filled and submitted sample vehicle service request records through the live form to generate report data — entries for “Jannani R”, “Ajay Shankar”, and a self-entry for “Indhu Mathy”.
- Opened the All Vehicle Service Requests report from the Reports panel in list view and confirmed all records appear with Owner Name, Email Address, Phone Number, Pickup Address, Vehicle Registration Number, and Service Type columns visible, showing “Showing 3 of 3” records.
- Opened the “Indhu Mathy” record individually and verified that every field — Issue Description, Additional Services, Preferred Date, Odometer Reading, Vehicle Type, Preferred drop off time, and Authorization checkbox — correctly stored and displayed the submitted values.
- Expanded the report’s column view to confirm the tabular data grid mapped every submitted value to its corresponding field.

OUTPUT

The following screenshots capture the completed application: the Form Builder showing the Owner Name field configuration, the live applicant-facing form preview, the individual report record for “Indhu Mathy”, and the All Vehicle Service Requests report listing all three sample submitted records.

1. Form Builder View — Owner Name Field Configuration

The screenshot displays the Form Builder interface for a 'Vehicle Service Request' form. On the left, a 'Basic Fields' palette lists various field types: Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, Drop Down, Radio, Multi Select, and Checkbox. The 'Owner Name' field is selected and highlighted. The main area shows the configuration for this field, including its name, field link name, validation (Mandatory), display fields (First Name, Last Name, Suffix), data privacy (Contains personal data), data security (Data encryption is not supported), visibility (Show field to Everyone), and appearance. The 'Field Properties' panel on the right provides additional configuration options for the selected field.

Fig 1. Form Builder — Basic Fields palette with the Owner Name field properties open

2. Live Form Preview

The screenshot shows the live preview of the 'Vehicle Service Request' form. The form is displayed in a clean, modern layout. The 'Owner Name' field is split into 'First Name' and 'Last Name' input boxes. The 'Email Address' field is a single input box. The 'Phone Number' field includes a country code dropdown (set to +91) and a numeric input box. The 'Pickup Address' field is split into 'Address Line 1' and 'Address Line 2' input boxes. Below these, there are dropdowns for 'City / District', 'State / Province', 'Postal Code', and 'Country'. The 'Vehicle Registration Number' field is a single input box. The 'Service Type' field is a radio button group with options: Oil Change, Tire Rotation, Brake Repair, Engine Diagnostics, Full Service, and Other. The 'Issue Description' field is a text area.

Fig 2. Live Preview — Owner Name, Email Address, Phone Number, and Pickup Address fields

3. Report View — Individual Record (Indhu Mathy)

The screenshot displays the 'All Vehicle Service Requests' report in a detail view for the record of 'Indhu Mathy'. The interface includes a sidebar with navigation options like Home, Request Kanban, All Requests, New Request, and Vehicle Service Requests. The main content area shows a table with three records, with the 'Indhu Mathy' record selected. A detailed form on the right side provides a comprehensive view of the record's data.

Owner Name	Email Address	Phone Number	Pickup Address
Jannani R	Jana_24@gmail.com	+918123478654	No 7 kumaran nagar, kolathur, Chennai, Tamilnadu, 600119, India
Ajay Shankar	ajay@gmail.com	+917022914384	No 1 shanthi road, kolathur, Chennai, Tamilnadu, 600110, India
Indhu Mathy	indhumathy.k.2024.csb@rajalakshmi.edu.in	+919962478747	9/31 vasu nagar, kolathur, Chennai, Tamilnadu, 600110, India

Owner Name	Indhu Mathy
Email Address	indhumathy.k.2024.csb@rajalakshmi.edu.in
Phone Number	+919962478747
Pickup Address	9/31 vasu nagar, kolathur, Chennai, Tamilnadu, 600110, India
Vehicle Registration Number	TN-052006
Service Type	Full Service
Issue Description	I need my vehicle to get serviced
Additional Services	Polishing
Preferred Date	19-Aug-2026
Odometer Reading	79
Vehicle Type	Choice 1
Preferred drop off time	10:34:29
Authorization checkbox	Choice 2

Fig 3. All Vehicle Service Requests Report — detail view of the “Indhu Mathy” sample record

4. Report View — Tabular List of All Records

The screenshot displays the 'All Vehicle Service Requests' report in a grid view, listing all three submitted records. The interface includes a sidebar with navigation options like Home, Request Kanban, All Requests, New Request, and Vehicle Service Requests. The main content area shows a table with three records, each with columns for Owner Name, Email Address, Phone Number, Pickup Address, Vehicle Registration Number, Service Type, and Odometer Reading.

Owner Name	Email Address	Phone Number	Pickup Address	Vehicle Registration Number	Service Type	Odometer Reading
Jannani R	Jana_24@gmail.com	+918123478654	No 7 kumaran nagar, kolathur, Chennai, Tamilnadu, 600119, India	TN - 0967835	Brake Repair	
Ajay Shankar	ajay@gmail.com	+917022914384	No 1 shanthi road, kolathur, Chennai, Tamilnadu, 600110, India	TN - 0978634	Tire Rotation	
Indhu Mathy	indhumathy.k.2024.csb@rajalakshmi.edu.in	+919962478747	9/31 vasu nagar, kolathur, Chennai, Tamilnadu, 600110, India	TN - 052006	Full Service	

Fig 4. All Vehicle Service Requests Report — grid view listing all three submitted records

RESULT

A fully functional Vehicle Service Request application was successfully designed and built in Zoho Creator using all thirteen Basic Fields. The Vehicle Service Request form correctly captures owner details across Owner Name, Email Address, Phone Number, Pickup Address, and other data-type fields, and the auto-generated All Vehicle Service Requests report accurately reflects every submitted record, confirming that the form-to-report data flow works as intended.
